## *Flow ~ Taking Water to the Next Level*

Kona Hawaii November 1-6, 2015

### Workshop Description:

On an island surrounded by water, we can take the water element for granted, but here we have the opportunity to see the way that water shapes the earth and interacts with plant life and all living things. Healing energy has been described as the flow of water since ancient times and is still the way most healers describe what energy feels like to them.

To begin a treatment and end a treatment with flow is every healer's aspiration. There is a generosity of spirit that is implied in that simple statement, and as we seek to become ever more conscious of our skills as healers we have to incorporate flow into every aspect of our work.

In this workshop we will focus on techniques and exercises to increase a healer's flow physically and spiritually and we will work together in practices and methods that will make it easy to practice elegant treatments which fill our patients with serenity and healing while challenging the resistance of disease.

**ROSALYN BRUYERE**, internationally acclaimed healer and teacher, has participated in energy medicine research and trained numerous physicians, nurses, and people from all walks of life. She is dedicated to integrating the understanding of and practice of energy medicine into our current medical systems. Her combined scientific and spiritual focus influences her teaching and serves to bridge the gap between concept and reality of practicing energy medicine today.
